

A large, solid green curved shape that starts from the left edge and sweeps upwards and to the right, partially obscuring the bottom right of the slide.

# CUI CAPS Compliance Pack

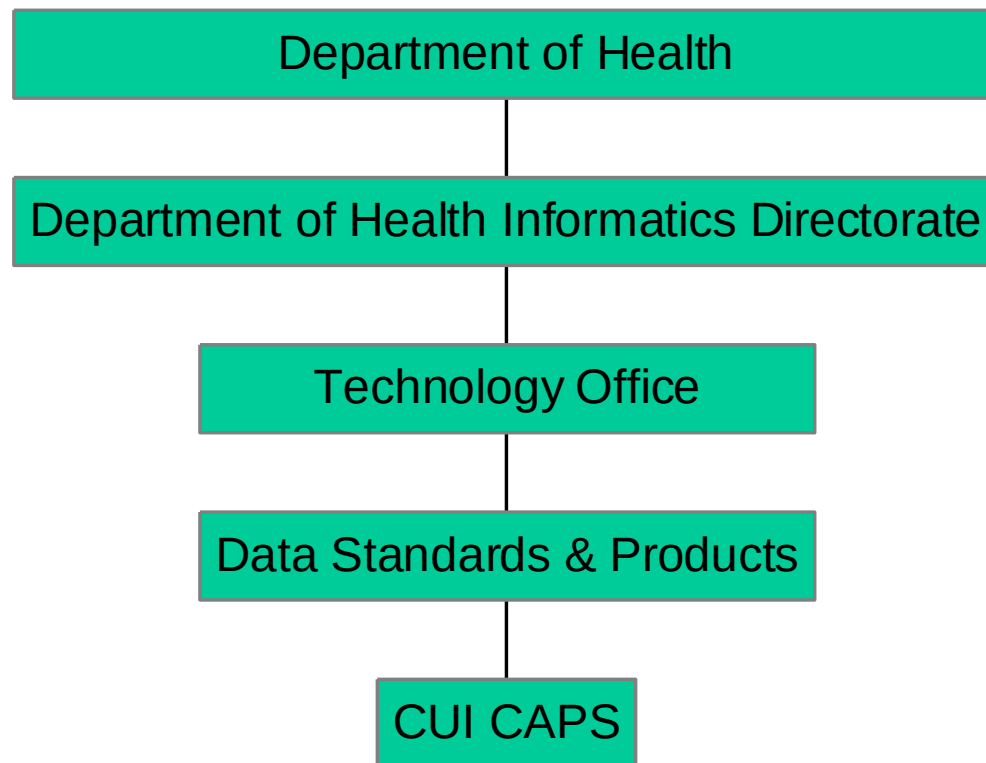

## Purpose

This pack introduces CUI CAPS compliance to healthcare IT suppliers and NHS Trusts. It also gives an overview of the process and tools required to demonstrate CUI CAPS compliance

## Contents

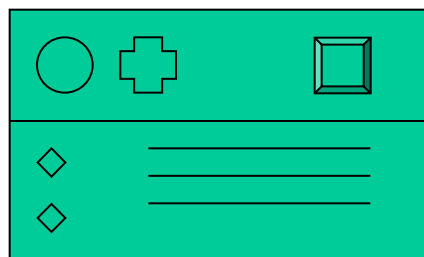

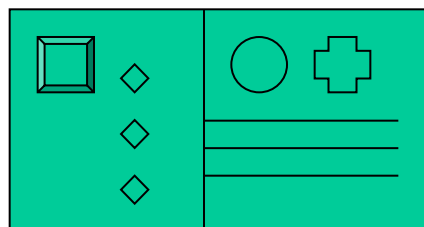

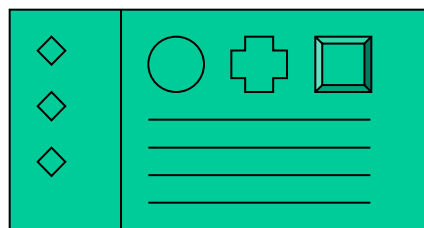

- Ownership of CUI CAPS work area – where CUI CAPS fits within the Department of Health
- CUI CAPS vision and aim
- Background, Clinical Safety and Standards
- The Clinical Safety Officer and compliance
- Introducing compliance: overview, the tasks and the processes
- Evaluation and feedback of CUI CAPS compliance process
- Terms and Abbreviations

# DH and CUI CAPS

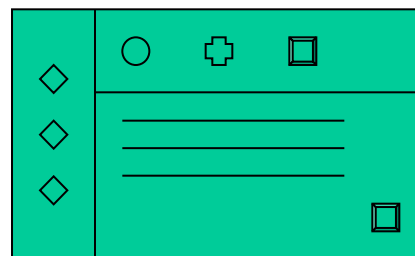

**CUI CAPS** = *a 'Common User Interface' work area focused on 'Clinical Applications and Patient Safety'*

## Current clinical IT systems

Many different application user interfaces mean that retraining is necessary.

## Common User Interface (CUI)

Standards can help enable safe and effective delivery of care without extensive re-training

## Our Aim:

*“Increase patient safety and clinical effectiveness and make IT systems easier to use”*

The CUI CAPS project aims to reduce the risk of misinterpretation of information and documentation input options by users of different clinical systems

The CUI CAPS portfolio of standards and guidance is for use in both health care application designs by healthcare suppliers and by clinical teams involved in the definition and design of healthcare application requirements for use in the NHS in England

The CUI website provides more information, please see [www.cui.nhs.uk](http://www.cui.nhs.uk)

# Clinical Safety Information

As the CUI CAPS project discovered during the research phase, there are many causes of safety hazards in relation the user interface display.

There are a limited set of safety themes that this set of information standards seek to address:

## Clinical safety hazard themes

Incorrect identification of the patient

Wrong record, wrong patient

Delayed, missed or inappropriate healthcare

# The Information Standards Board for Health and Social Care

The ISB HaSC is the Board responsible for setting information standards for the NHS and adult social care in England. Please see the ISB website for more detailed information [www.isb.nhs.uk](http://www.isb.nhs.uk)

The ISB HaSC has mandated CUI CAPS demographics standards as Data Set Change Notices (DSCN's). The next slide provides the detail

The ISB HaSC has also issued 2 separate DSCN's that address the application of clinical risk management of manufacture and deployment of health software - links to the standard specification documents are below

**DSCN 18/2009** - Patient Safety Risk Management System - Deployment and Use of Health Software

<http://www.isb.nhs.uk/documents/isb-0160/dscn-18-2009/0160182009specification.pdf>

**DSCN 14/2009** - Patient Safety Risk Management System – Manufacture of Health Software

<http://www.isb.nhs.uk/documents/isb-0129/dscn-14-2009/0129142009spec.pdf>

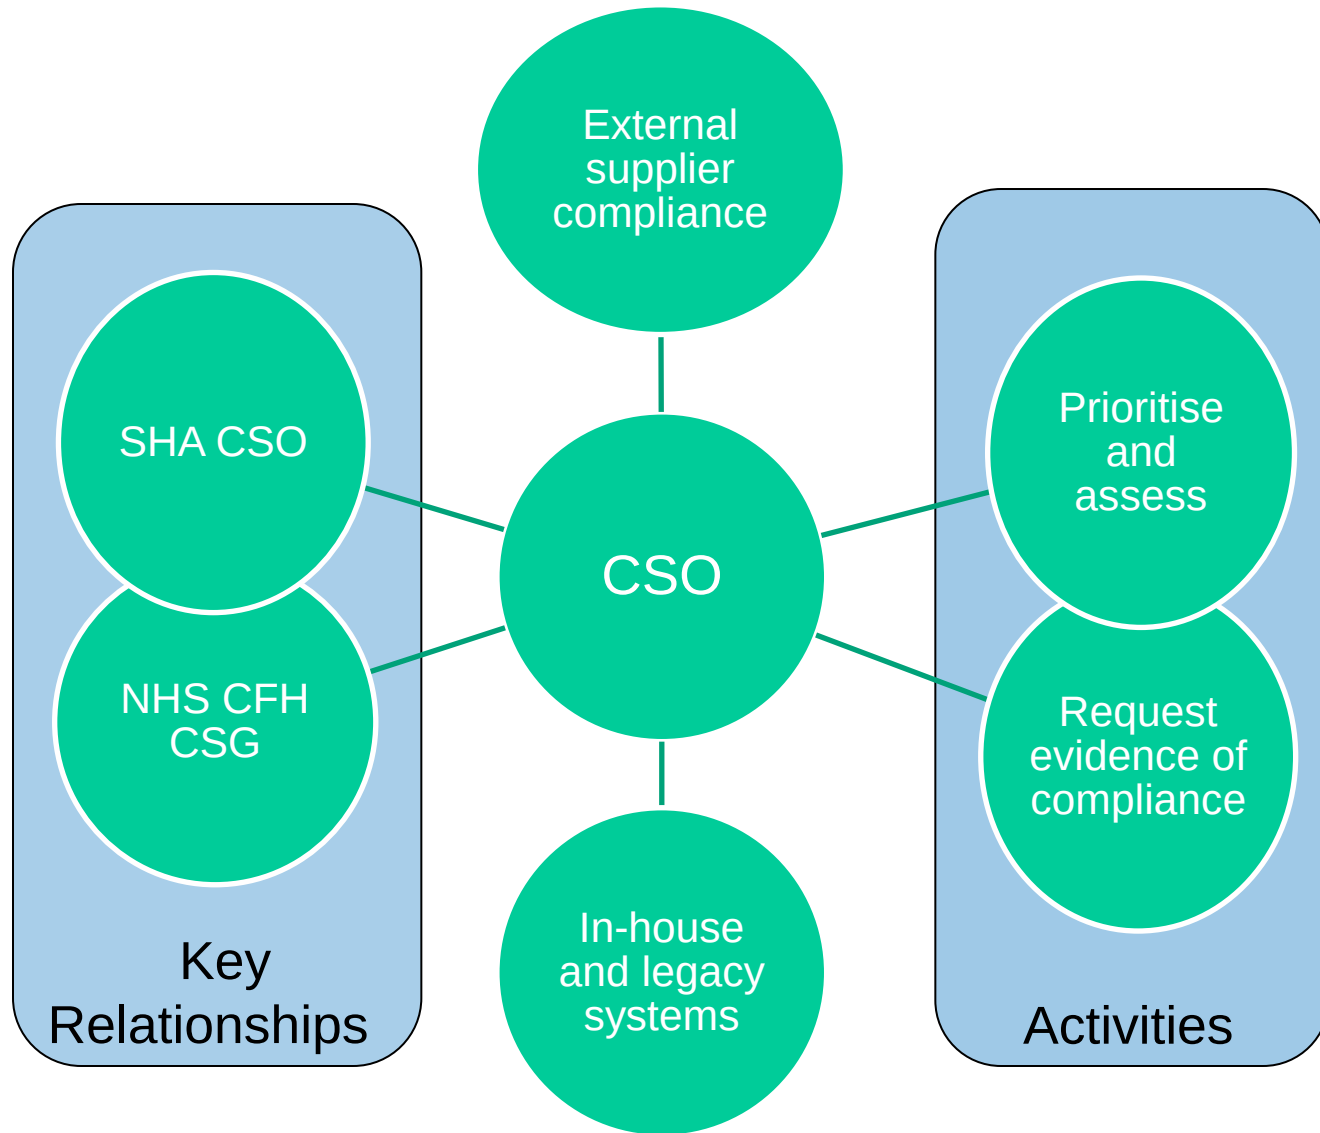

| Address Input and Display                |
|------------------------------------------|
| Date and Time Input                      |
| Date Display                             |
| NHS Number Input and Display             |
| Patient Banner                           |
| Patient Name Input and Display           |
| Sex and Current Gender Input and Display |
| Telephone Number Input and Display       |
| Time Display                             |

**IT systems must conform to these standards by 1 December 2015**

Further detail for each patient safety standard can be accessed at [www.isb.nhs.uk/use/baselines/cui](http://www.isb.nhs.uk/use/baselines/cui)

# The Trust Clinical Safety Officer and Compliance

## The Aims

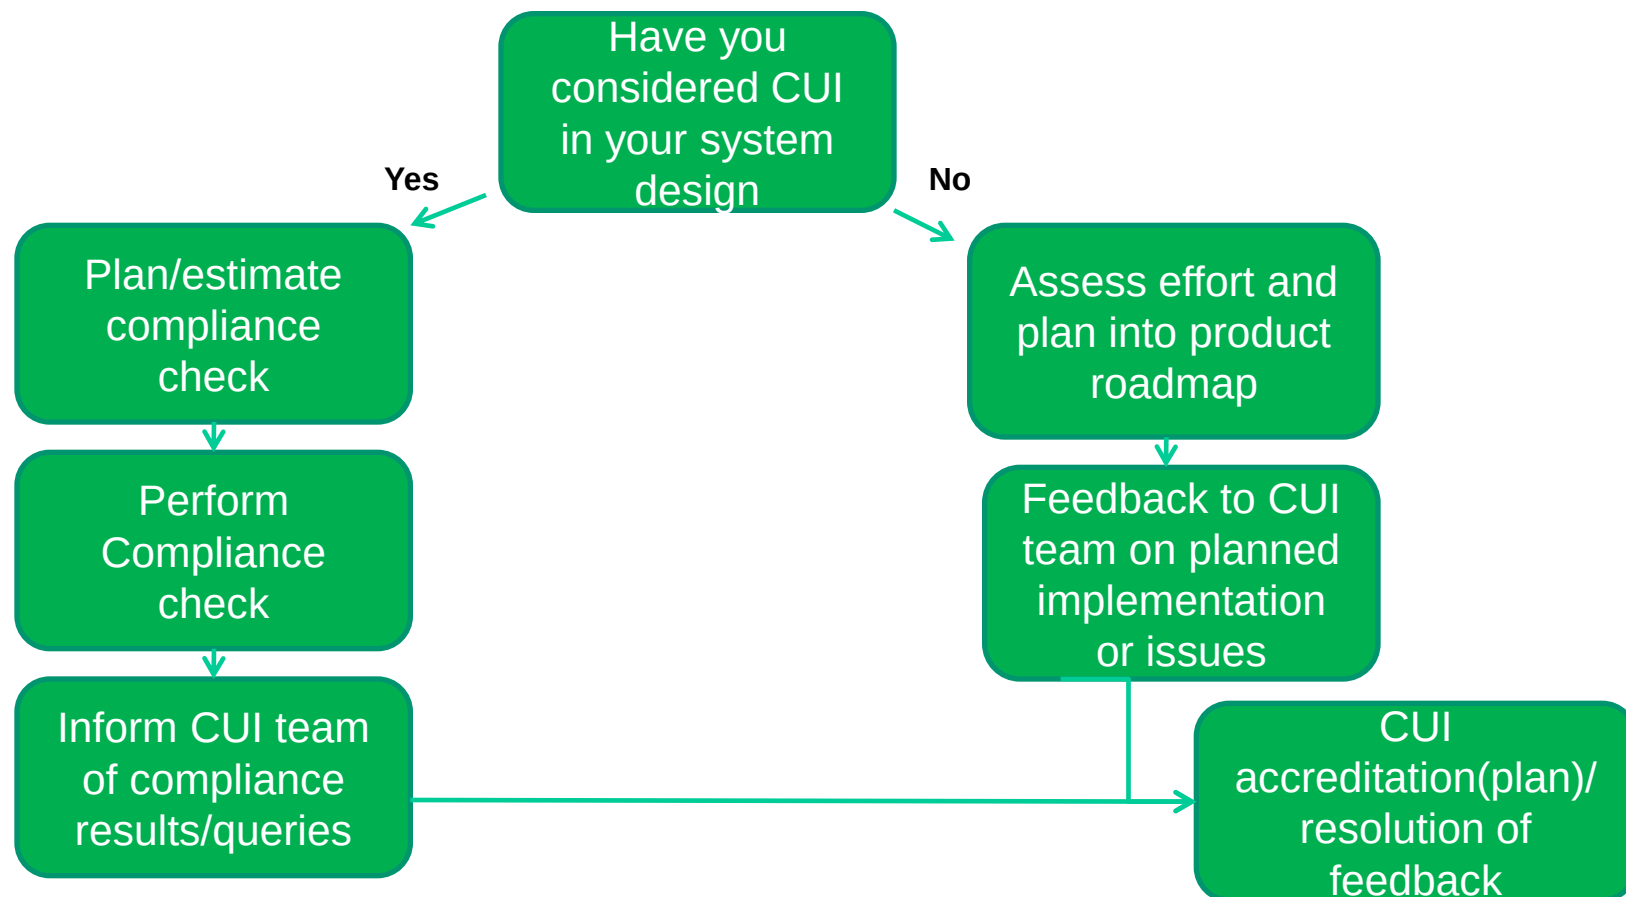

- To enable healthcare IT suppliers to demonstrate they are meeting the requirements of the CUI CAPS patient safety standards (the DSCN's)
- To inform NHS Trusts about the CUI CAPS patient safety standards and empower NHS Trust representatives to request this information from healthcare IT suppliers
- Give accreditation to suppliers for CUI CAPS compliance

# What we want you to do

## Work with suppliers to

- Undertake the compliance checks as per defined process
- Evaluate the compliance process and provide feedback on the process and tools
- Provide feedback on CUI design guidance if identified

# The CUI CAPS Compliance Process

Feedback to cuistakeholder:

[cuistakeholder.mailbox@nhs.net](mailto:cuistakeholder.mailbox@nhs.net)

We realise that from a trusts perspective there will be a need to prioritise systems to identify which ones should be implementing the patient safety standards. Working with Trusts we have found that it is best to consider:

- **Type of system** – assess the clinical risk and potential clinical safety benefits
- **System owners** – you might have a strong influence internally or be dependant on a supplier
- **Roadmap/development opportunities** e.g. There may be opportunities to insert CUI CAPS requirements in new procurements, upgrade requests etc.

# System review activities

- For systems that you prioritise the following activities should be considered:
  - Contact suppliers/internal teams to inform about CUI CAPS DSCN's and understand current status
  - Assess the software for compliance
  - Evaluate the effort of any updates
  - Request activities to attain CUI CAPS compliance in roadmap/plans
  - Give feedback to the CUI CAPS Team on the design guidance and compliance process

# Compliance example

Guidance document

PAB-0001

The Patient Banner should consist of two zones, Zone 1 and Zone 2

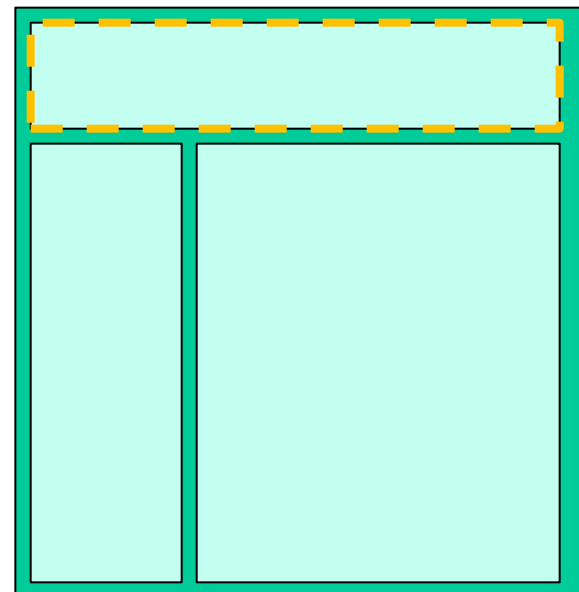

*Recommended*

CHANDRASEKHAR, Subramanyan (Mr) Born 14-Jul-1945 (61y) Gender Male NHS No. 129 728 7652

PAB-0073

The Patient Banner must include Zone 1

*Mandatory*

| Section       | ID       | Guideline                                                         | Status      | Compliance yes / no |
|---------------|----------|-------------------------------------------------------------------|-------------|---------------------|
| structure and | PAB-0001 | The Patient Banner should consist of two zones, Zone 1 and Zone 2 | Recommended |                     |
| structure and | PAB-0073 | The Patient Banner must include Zone 1                            | Mandatory   |                     |

Compliance checklist

# Tools

Full CUI design guidance – includes supporting information on the project, safety issues, references see our guidance catalogue [www.cui.nhs.uk](http://www.cui.nhs.uk)

QIG – Quick Implementation Guidance documents. See our guidance catalogue [www.cui.nhs.uk](http://www.cui.nhs.uk)

Check lists – The guidance check lists in Microsoft Excel will help you to assess the healthcare IT system and document the level of compliance the system demonstrates. See our compliance section [www.cui.nhs.uk](http://www.cui.nhs.uk)

# What you will need

- Access to [www.cui.nhs.uk](http://www.cui.nhs.uk)
- Familiarity with the Full CUI design guidance, access to the QIG's
- The check list – downloaded from [www.cui.nhs.uk](http://www.cui.nhs.uk)
- The application/s you are assessing for compliance level
- Commitment from the suppliers/time to do the assessment and time to complete the evaluation questionnaire

# Feedback

In order to ensure this process is useful, realistic and achievable the CUI Team request your feedback

An **online questionnaire** will be available to give you the opportunity to give detailed feedback on the process.

[CUI Compliance Feedback](#)

We welcome feedback on any aspect of this pack. Please direct your feedback to the CUI team via

[cuistakeholder.mailbox@nhs.net](mailto:cuistakeholder.mailbox@nhs.net)

**General enquiries** or feedback on a specific design guidance area should be sent to

[cuistakeholder.mailbox@nhs.net](mailto:cuistakeholder.mailbox@nhs.net)

# Terms and Abbreviations

| Abbreviation | Definition                                                                           |
|--------------|--------------------------------------------------------------------------------------|
| CUI          | Common User Interface                                                                |
| CUI CAPS     | Common User Interface                                                                |
| DSCN         | Data Set Change Notice (now known as Information Standards Notice)                   |
